

AKVIS ArtSuite 14: 3D Frames and Other New Decoration Options!

May 8, 2018 – AKVIS announces a major update of ArtSuite, a fun and easy to use software to apply decoration effects to digital photos. Version 14 offers a number of significant effect enhancements: brand new 3D tab in the Classic frame, combination of the Passe-Partout and the Classic frame, new Edge Color option in the Ragged frame, new Posterizing option in the Halftone effect, and other changes.

AKVIS ArtSuite is a versatile software for creative photo decoration. There are two effect groups in the program: **Frames** ranging from elegant classic frames to modern funky edge decors; and **Effects** which provide a wide variety of photo transformation options. Each effect/frame is fully customizable and can be easily altered. Give an artistic touch to your photographs!

In **version 14**, the *Classic* frame offers the new *3D Tab* that makes the frame appear more prominent and thus much more realistic. Also, it is now possible to combine the *Passe-Partout* with a *Classic* frame without having to save the intermediate result. The updated *Ragged* frame allows users to imitate the glow/shadow effect. The *Halftone* effect offers the new *Posterizing* feature that simplifies an original image and makes the result more clear and dramatic.

Additionally, the recent version comes with a number of new ready-to-use presets and minor bug fixes.
