

AKVIS MAKEUP 5.0: PERFECT SELFIE IN A MOUSE CLICK

December 14, 2017 — AKVIS announces MakeUp 5.0, easy-to-use portrait enhancement software. Version 5.0 offers the brand new portrait retouching algorithm with significantly improved results. Also, it provides the updated list of ready-to-use presets, the improved Vignette effect, the Crop tool, some interface changes, and other improvements.

AKVIS MakeUp is an automatic retouching software for portrait shots.

In the age of smartphones and selfie sticks, we can't help but take tons of photos to preserve all the moments that are passing by so fast. **AKVIS MakeUp** makes the portrait images look flawless and appealing. The results are comparable to the retouching done by a professional photographer: smooth, even, radiant skin without any signs of wrinkles or blemishes. Additionally, the program whitens teeth and eliminates the red-eye effect. Give your photos a glossy fashion look!

Version 5.0 provides the brand new portrait retouching algorithm that removes imperfections and evens skin tone without making the face look plastic and unnaturally smooth.

The new version offers the updated collection of built-in *presets* designed by professional artists.

The new *Position* setting allows users to adjust the location of the *Vignette*.

The *Crop* tool has been added. It allows reducing the image to a desired size and removing unwanted parts without leaving the program.

Also, the new version offers full compatibility with Photoshop CC 2018, new Gray interface theme, support for new RAW files, and some other improvements and bug fixes.

[Download AKVIS MakeUp 5.0](#) and try all features of the software during the 10-day trial period.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; Mac OS X 10.7-10.11 and macOS 10.12-10.13. The product is available as a standalone application and as a plugin filter for AliveColors, Adobe Photoshop and other image editors.

AKVIS MakeUp, Home license, sells for \$39. One license key allows activating and using the software on two computers. [Consult the official website](#) for more details about license types and prices of the software.

The update is free for users who bought MakeUp in the last 12 months. Users, whose license is older and is not valid for the new version, can get MakeUp 5.0 for only \$14.95.

AKVIS (akvis.com) specializes in development of video & image processing software. Since the company's launch in 2004, it has released a number of

successful products: standalone applications and Photoshop plugins for Windows and Mac.
