

## AKVIS NatureArt 10: Stars, Meteors, and Nebulae on Your Photos!

March 22, 2018 – AKVIS announces the release of AKVIS NatureArt 10, one-of-a-kind software for imitating natural phenomena on digital photos. Version 10 offers the new Night Sky effect with a number of ready-to-use presets, full compatibility with Photoshop CC 2018, some interface improvements, etc.

**AKVIS NatureArt** is a tool for imitating the majesty of natural phenomena on digital photos.

The program enables users to instantly change the weather, time of day, season, or other features in landscape photos using just a single mouse click. Also, it is possible to create images from scratch which is a nice feature for those who want to have total creative control. Make a sparkling snowy Christmas card, enliven a dark landscape, cover your picture with enchanted fog or freeze it, add fire and lightning to your photo, create a fantastically surreal scenery... With NatureArt everyone can become a wizard!

The [recent version](#) offers 11 breathtaking nature effects: [Rain](#), [Sun](#), [Water](#), [Lightning](#), [Clouds](#), [Frost](#), [Rainbow](#), [Aurora](#), [Fire](#), [Ice](#), and the brand new [Night Sky](#) effect.

The new [Night Sky](#) effect adds scattering and shooting stars, bright shining meteors and star trails as well as iridescent nebulae to digital images. The effect comes with a number of customizable presets created by professional artists.

Also, the new version offers the updated *New Image* dialog, provides full compatibility with Photoshop CC 2018, includes various interface improvements, support for RAW files, and other changes.
