AKVIS CHAMELEON 9.0: NEW TOOLS, SUPPORT FOR ULTRA HD, AND OTHER CHANGES

November 17, 2016 — AKVIS announces the major update of Chameleon, an ingenious software for creating photo collages. The new version brings lots of improvements: new tools and settings, modernized interface with support for 4k & 5k screens, advanced montage algorithm, etc.

AKVIS Chameleon is an efficient tool for photo collage creation that allows combining digital photographs into one scene and seamless inserting an object into another image. The program works automatically; it is not obligatory to create a precise selection of objects. With the software, you can make personalized greeting cards, simulate a double exposure effect, design a timeless wedding album or a fairy-tale book with your kids as main characters. You can improve your photos by replacing defective parts with new ones or teleport yourself to places you always dreamed of!

Version 9.0 offers new selection and post-processing tools, an advanced montage algorithm, a redesigned interface with support for Ultra HD resolution, and other improvements. Create wonderful collages from your photos!

In Version 9.0:

- **Enhanced Montage Mode**

The **Montage** algorithm has been improved. The edges of the fragment are now processed more correctly.

- **New Selection Tools**

The new version offers additional **Selection Tools**: *Rectangular Selection*, *Elliptical Selection*, *Lasso Tool*, and *Selection Brush*.

Using these tools you can quickly create geometric or free-form selections. They are especially useful in order to obtain a precise selection shape.

- **Post-Processing Tools**

The new version includes **Post-Processing Tools**: *Smudge*, *Blur*, and *History Brush*.

The tools allow you to mix colors in the image, smooth or blur the edges of the inserted fragment, and restore the image to its original state.

- **Support for 4K & 5K**

The new version provides support for ultra high video resolutions going far beyond traditional 1080p systems. The texts and new vector based icons now scale correctly on 4K & 5K displays.

- **And other changes.**

Download AKVIS Chameleon 9.0 and try all the features of the software during the 10-day evaluation period.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; and on Mac OS X 10.7-10.12. The product is available as a standalone application and as a plugin filter for Photoshop and other popular graphics editors.

AKVIS Chameleon, Home license, sells for $54. One license key allows activating the software on two computers. Visit akvis.com for more details.

The update is free for users who bought Chameleon in the last 12 months. Otherwise you can upgrade to version 9.0 for only $14.95.
