CHANGE TEXTURES ON YOUR IMAGES WITH AKVIS DECORATOR 4.0!

May 14, 2015 — AKVIS announces the release of AKVIS Decorator V.4.0 available as a standalone application and Photoshop compatible plugin, in versions for Windows and Mac OS X. The software applies a new texture and color to an object on an image.

AKVIS Decorator lets you change the surface of an object in a realistic manner. The program applies a new texture or a color keeping the volume of an object, following its folds and creases. The new pattern looks absolutely natural and makes you see things differently!

The program is equipped with a rich Texture Library, with more than 1,800 textures, from fabrics to stones and metal, from food to nature elements. You can also apply your own textures.

The software is easy and fun to use, it has a neat interface. Just select a part of an image, for example, a dress on a girl, and apply new textures to it. The girl can have her dress painted in cheerful patterns, dotted or chequered, appear as if made of velvet or satin, or even of wood or candies.

The program is extremely useful for designers, decorators, and people remodeling their homes. With the software you can quickly choose a suitable design for your apartment by playing with different colors and patterns for furniture, walls, curtains, decorations, etc. It's useful for designers to show the customers the same room in different versions or for web-designers to represent the same items in an online shop in various colors/patterns. Decorator is your indispensable helper!

Demonstrations of the Decorator's features are available at the Examples Gallery.

In Version 4.0:

- Added the Share option that lets users post pictures from the program to Flickr, Twitter, Google+, Dropbox.
- Added native support for 64 bit. Improved the program performance on 64-bit Windows and Mac OS.
- Changed the installation process on Windows. Now two setup files are available: for Windows 32 bit and Windows 64 bit.
- Improved compatibility of the plugin with Adobe Photoshop Creative Cloud 2014.
- Fixed minor bugs.

All registered users of Decorator can upgrade to the new version 4.0 for free.

Download AKVIS Decorator 4.0! For a free trial, AKVIS offers 10 days of fully functional use.

The product is available as a standalone program and as a plugin filter for Adobe Photoshop and other image editors. The software runs on Windows XP/Vista/Win7/Win 8 and on Mac OS X 10.6-10.10.

AKVIS Decorator Home license sells for $54. AKVIS subscribers can buy the product at a special reduced price, 10% Off. One license key allows activating and using the software on two computers. For more information about the software visit http://akvis.com/en/decorator/.

AKVIS (akvis.com) specializes in development of image processing software and scientific research. The company was founded in 2004 by IT professionals having considerable experience in programming and software development. Since then the company has released a number of successful programs.
