

AKVIS LIGHTSHOP 5.5: ADD MYSTERIOUS ALIEN LIGHTS TO YOUR PHOTOS!

May 29, 2017 — AKVIS announces the release of AKVIS LightShop 5.5 for Windows and Mac OS X. The software creates impressive light effects in a fast and uncomplicated way. The new version features a number of new presets added to the already extensive collection.

AKVIS LightShop is a powerful and versatile program for generating brilliant light and star effects. The program lets you create extreme luminous supergiant stars, radiant skylights, festive fireworks, dramatic sunbursts, otherworldly glowing moon, colorful stage lights, magical shimmers, glittering sparkles, and much more - just about anything you can conjure up in your imagination!

A major advantage of the software is the ability to quickly and easily fine-tune any light element in the *Advanced* mode. For beginners and those who prefer a simpler approach, the software offers the *Express* mode with the reduced settings palette. Version 5.5 includes new futuristic light effects reminiscent of UFO landings lights, starburst, laser beams, and neon flashes. Take advantage of ready-to-use presets to make your photos look extraordinary!

In Version 5.5:

- **Alien Lights Effects**

The brand new **Alien Lights** group offers a number of artists-designed presets. They let you turn an ordinary photo into something truly spectacular with a simple mouse click! All effect elements are completely adjustable and flexible so you can easily customize every single detail if needed.

- **Fixed Minor Bugs**
