

RETOUCHING AND PAINTING TOOLS IN AKVIS MULTIBRUSH 8.0

April 24, 2014 — AKVIS announces the release of AKVIS MultiBrush v.8.0, image editing software, available as a standalone application and Photoshop plugin for Windows and Mac. It provides a rich collection of healing and enhancement brushes, stamping and drawing tools. The new version offers many improvements.

AKVIS MultiBrush has been updated to version 8.0!

It is a real digital creative workshop, exhaustive image enhancement solution featuring a collection of useful tools, layers and channels palettes, and other essential features.

Retouching and painting tools in the program are grouped into two sets: **Standard** and **Artistic Brushes**. The software makes it easy to retouch photos and enhance portraits and even lets you draw amazing paintings and add funny details on your pictures.

Despite the variety of features, the program is simple and straightforward. In addition to its retouching and painting brushes, MultiBrush also has a number of useful "common" tools which help to edit images. It provides the most popular operations with images: lets you crop a photo to improve its composition, make selections, add text.

The new version brings more flexibility and provides many improvements for the tools!

In Version 8.0:

- Added the **Blend Mode** to the settings of these tools: **Color Brush, Color Pencil, Clone Stamp**.
- Increased the maximum value (to 1000 pixels) for the **Size** for the tools: **Color Brush, Color Pencil, Spray, Eraser, History Brush, Clone Stamp, Chameleon Brush, Lighten, Darken, and Saturation**.
- Added the options **Color Sampling** and **Tolerance** to the **Eraser**.
- Added the **Grain** parameter to the **Artistic Pencil**.
- Added the possibility to rotate a cropping area to the **Crop** tool.
- Added the possibility to transform objects (in the previous versions was available only for text).
- Added support for more **RAW** formats.
- Fixed bugs in **Spray** and **Chameleon Brush** and some other errors.

Registered users of the software can upgrade to the new version for free.
