

ADD GLOW TO YOUR IMAGES WITH AKVIS NEON 2.0: NOW WITH HATCHING AND FRAMES!

April 6, 2016 — AKVIS announces the release of AKVIS Neon 2.0 for Windows and Mac OS X. The new version introduces stunning innovations in the interface, support for Ultra HD resolution, an improved glow effect with new settings and tools, new decoration effects and frames, and other significant changes!

AKVIS Neon creates amazing glowing lines effects. The software transforms a photo into a sparkling image that looks like drawn with light or luminescent ink.

It produces outstanding glowing landscapes and extraordinary portraits, and can be used to just slightly outline edges making an image more interesting and stylish. It turns an ordinary picture into a gorgeous drawing. Make your photos shine with **AKVIS Neon!**

With the release of the new version, the software is now even more effective, impressive, and fun!

In Version 2.0:

- **Improved Glow Effect**

The new version provides the new effect settings: Sharpen Detail and Extra Sharpen Detail.

Also, new groups of settings are now available in the Adjustment tab: Hue and Hatching.

- **New Decoration Effects**

The new Decoration section contains three effects: Canvas, Text, and (New!) Frame. Drag the tabs to change the order of their application to an image.

The program offers these kinds of frames: Classic, Pattern, Strokes, Vignette, and Passe-Partout.

- **New Presets**

The new version includes an updated list of the ready to use presets created with the new features.

- **Improvements in Tools**

New post-processing tools - Lighten and Darken - have been added to the After tab (Deluxe/Business).

The Crop tool has been improved and now offers the possibility to set the aspect ratio and the list of ratio presets.

The Quick Preview area has been increased (adjustable in the program's preferences).

- **Support for 4K and 5K resolution screens**

The interface has been modernized and provides better display capabilities. The texts and new vector based icons now scale correctly even on super high resolution displays.

- And other changes.
