

AKVIS WATERCOLOR 2.0: ABSTRACT MASTERPIECES WITH A MOUSE CLICK!

July 19, 2017 — AKVIS announces the release of AKVIS Watercolor 2.0, the powerful software for imitating different watercolor techniques. Version 2.0 opens up new artistic horizons by adding the Abstract Art tab and new built-in presets.

AKVIS Watercolor turns digital photos into masterful aquarelle paintings. The software offers the wide range of settings and tools giving users immense control over the generated strokes and every single detail. Using the *Decoration* options it is possible to personalize the resulting painting with a signature, canvas surface, or a unique picture frame.

Version 2.0 offers the new *Abstract Art* tab that allows adding bright accents to an image, adjusting its overall tonal range, and experimenting with shapes of objects.

The new version provides users with a number of additional ready-to-use presets that can be applied to any photo with just one click.

Also, some minor bugs have been fixed.

[Download AKVIS Watercolor 2.0](#). The trial version is free and fully functional for 10 days.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; and on Mac OS X 10.7-10.11 and macOS 10.12. The product is available as a standalone application and as a plugin to photo editors: AliveColors by AKVIS, Adobe Photoshop, and others.

AKVIS Watercolor 2.0 Home sells for \$49, Deluxe for \$69, Business for \$89. One license key allows activating and using the software on two computers.

The upgrade is free for all registered users of the program.

AKVIS (<http://akvis.com>) specializes in development of image and video processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
