AKVIS ArtWork 10: A Variety of Painting Styles in One Software!
New Tools and Decoration Features

April 17, 2018 — AKVIS announces the release of AKVIS ArtWork 10, a versatile photo to painting software designed to imitate different painting techniques. Version 10 offers new Post-Processing Tools and decoration options, various interface improvements, support for PSD and new RAW files, and other changes.

AKVIS ArtWork imitates the most popular painting and drawing techniques: oil, watercolor, comics, pen and ink, gouache, linocut, and pastel. The program easily creates a piece of art from any photo: whether wedding photos or pictures from the holiday trip, portraits or abstracts, fashion images or simple selfies... Users just need to load a photo and select a painting style - the software automatically turns the picture into a mind-blowing masterpiece!

Version 10 offers new *Post-Processing Tools*: *History Brush* added to all painting styles and *Color Brush + Eraser* added to the Linocut style. Using the tools, it is possible to manually edit the automatic processing results.

The *Decoration* tab provides a number of improvements and new features: updated *Texture Library*, new *Random Pattern* feature, easy-to-use icons instead of check-boxes, etc.

Also, the recent version offers full compatibility with Photoshop CC 2018, support for PSD files and new RAW files, the new *Gray* interface theme and other changes and interface improvements.
