

AKVIS ArtWork 11: Photo to Painting Software. New Pointillism Style!

August 7, 2018 – AKVIS announces ArtWork 11, an artistic software designed to imitate different painting techniques. Version 11 offers the brand new Pointillism style that uses distinct dots of colors to form an image. Also, the new version includes the Notification Panel and support for more RAW files.

AKVIS ArtWork is the perfect virtual artist that applies different painting styles to digital photographs: oil painting, comics, pen and ink drawing, watercolor painting, pastel, linocut, etc. You can create a piece of art out of any image: from self-portraits and landscapes to wedding photos and still lifes. Just install the software and start the creative process!

Version 11 introduces the new **Pointillism** style (**Deluxe/Business**) that goes back to George Seurat, Paul Signac, and Vincent van Gogh. This artistic technique is based on putting distinct dots of color next to each other to form a larger image. Pointillism allows the viewer's eye to see both the whole and the parts as one.

The *Notification Panel* added in the recent version is designed to keep users informed about the latest product updates.

Also, the new version offers support for new RAW files and minor bug fixes.
