

## Press Release

### AKVIS Explosion 1.5: Sand & Dust Effects - Explode Your Images Creatively!

*April 7, 2020 – AKVIS announces the free update of AKVIS Explosion, a powerful creative tool to apply dispersion effects to photos. Version 1.5 offers a new option to the Sand effect, support for more RAW formats, and better stability.*

**AKVIS Explosion** provides truly sensational destruction effects for photos. We often see such particle explosion effects in music videos and superhero and sci-fi movies. With AKVIS Explosion, it's easy to achieve a lot of creative visual effects: you can disintegrate a part of a body, add a glowing line speed motion effect, sandstorm, gold dust, falling stars, flying hearts, magical whirlwinds, and explosion waves... Everything you can imagine! The Explosion effects are perfect for creating illustrations, promo images, booklets, online articles, greeting cards, any kind of digital works.

The software has unlimited creative possibilities. It includes two general effects: **Particles** and **Sand**; both are rich in features and allow users to generate eye-catching images in just a few minutes.

The Sand effect makes a part of an image scattered by grains of sand and dust. The Particles effect turns a selected part of an image into a sparkling cloud of flying particles. The program offers an extensive library of various patterns and lets users load custom samples. Make your photos unique and bring your creative ideas to life!

**Version 1.5** introduces the new Layer Blend Mode in Sand that makes the effect even more masterly and varied. Add blockbuster special effects to your images!

Also, the list of supported RAW formats has been extended, all known bugs have been fixed.

**Download AKVIS Explosion 1.5!** The 10-day free trial is fully functional and can be used without activation.

The software runs on Windows 7, 8, 8.1, 10 - 32/64-bit; Mac OS X 10.10-10.11 and macOS 10.12-10.15 – 64-bit.

AKVIS Explosion is available as a standalone application and as a plugin filter for compatible image editors: **AliveColors** by AKVIS, Adobe Photoshop, Corel PaintShop Pro, and other popular image processing programs.

Registered users can update to the new version for free!

New customers can buy the Home license for \$29.00. The software is also available in Home Deluxe and Business licenses. For more details about AKVIS Explosion, please visit [akvis.com](http://akvis.com).

**AKVIS** ([akvis.com](http://akvis.com)) specializes in the development of photo & video processing software. Since the company's launch in 2004, it has released a wide selection of successful products for Windows and Mac. The company always keeps up with the times and updates its products with cutting-edge technologies.
