

AKVIS Magnifier 9.5: Intelligent Image Resizing without Quality Loss!

September 12, 2018 – AKVIS announces the release of Magnifier 9.5, a powerful image resizing tool. The recent version offers the integrated Notification Panel, features various interface improvements, ensures compatibility with Photoshop CC 2018 as well as provides support for new RAW files, etc.

AKVIS Magnifier is a professional image resizing software designed specifically for minimizing visual distortion and maximizing the output quality. The program uses advanced enlargement algorithms that allow increasing a picture by dozens of times without noticeable artifacts or halos. Also, the software can reduce an image without destroying its important content. With the batch processing feature, it is possible to process hundreds of photos at once.

Version 9.5 offers the integrated *Notification Panel*, support for new RAW files, full compatibility with Photoshop CC 2018, a number of interface improvements and bug fixes.

[Download AKVIS Magnifier 9.5](#) and try all features of the software during the 10-day trial period.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; Mac OS X 10.7-10.11 and macOS 10.12-10.13. The product is available as a standalone application and as a plugin filter for Adobe Photoshop and Adobe Photoshop Elements.

AKVIS Magnifier, Home license, sells for \$89. One license key allows activating and using the software on two computers. [Consult the official website](#) for more details about license types and prices of the software.

The update is free for users who bought Magnifier in the last 12 months. Users, whose license is older and is not valid for the new version, can get Magnifier 9.5 for only \$14.95.

AKVIS (akvis.com) specializes in development of video & image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
