

New AKVIS PhotoBook 1.0 Software – Photo Books & Albums for Any Occasion!

November 7, 2022 – AKVIS is excited to announce the release of the new AKVIS PhotoBook 1.0 program for decorating photographs and creating photo collections, with additional design themes, and the launch of the new akvisphotobook.com website.

AKVIS expands its product portfolio with the release of the new software.

AKVIS PhotoBook 1.0 is a fully customizable program for making high-quality photo books and photo albums.

The new software allows you to generate photo books using the page templates created by professional designers exclusively for PhotoBook. It's possible to add clipart images, labels, inscriptions, and other embellishments to make a unique and inimitable photo book filled with priceless memories.

The program includes essential photo enhancement features. Users can adjust brightness, contrast, saturation, and sharpness of images, create a vintage photo look. PhotoBook allows users to decorate the edges of pictures with the vignette or scratches effect, or apply ready-made professional designs.

The software comes with a collection of pre-installed templates (Default Theme). Users can extend the program's functionality by adding themes - PhotoBook's thematic design sets. Every design set contains many ready-to-apply pages and decorations.

With the launch of the akvisphotobook.com website and the release of the new program, two themes have also been published. AKVIS plans to constantly release new design sets to satisfy a variety of requests.

The software runs on Windows 7, 8, 8.1, 10, 11; macOS 10.12-13.0 (64-bit). The program offers a multi-language user interface.

AKVIS PhotoBook is available in Free and Business versions. The Free license is strictly for personal, non-commercial use. The Business license (\$69.00.) allows commercial use of the software.
