### AKVIS Releases Refocus 10.0: Now with Improved Bokeh Effects!

*January 14, 2020 – AKVIS announces the major update of AKVIS Refocus, software to fix out-of-focus photos and apply various blur effects. Version 10.0 offers the enhanced bokeh effects, new presets, fixed bugs and improved program's stability.*

**AKVIS Refocus** enhances the sharpness of blurred images and adds artistic bokeh and lens blur effects. The program works in five modes: [Refocus](#), [Tilt-Shift](#), [Iris Blur](#), [Motion Blur](#), and [Radial Blur](#). The effects can be applied to an entire photo or a selected area of a photo.

**Version 10.0** offers the significantly improved [Bokeh Effect](#). It is now possible to adjust the brightness of light spots and get a more intense and eye-catching effect.

Also, the updated program provides a number of new ready-to-use presets as well as some bug fixes and stability improvements.

[Download AKVIS Refocus 10!](#) The free trial is fully functional and can be used free of charge for 10 days.

The software runs on Windows 7, 8, 8.1, 10 - 32/64-bit; Mac OS X 10.10-10.11 and macOS 10.12-10.15 - 64-bit. The product is available as a standalone application and as a plugin filter for [AliveColors](#), Adobe Photoshop, Corel Photo-Paint, and [other image editors](#).

AKVIS Refocus Home sells for \$39.00. Deluxe and Business versions with more effects and tools are also available for sophisticated users and commercial clients. Consult the official website [akvis.com](#) for more details about license types and prices of the software.

The update is free for users who bought the product in the last 12 months. Users, whose licenses are older and are not valid for the new version, can get Refocus 10.0 for only \$14.95.
