

AKVIS SMARTMASK 10: NOW EVEN MORE POWERFUL! REFINE RADIUS TOOL

October 11, 2017 — AKVIS announces SmartMask 10, a powerful selection tool designed to make image masking fun and simple. Version 10 provides users with the new Refine Radius tool, enhanced Magic Brush tool, and other improvements.

AKVIS SmartMask is a efficient masking tool that lets users quickly and effortlessly create precise selections. The software allows switching between *Auto* and *Manual* modes to achieve the best possible result with any photo. For more nuanced and precise excision of a monochrome background, SmartMask offers the *Chroma Key* mode. To improve the selection to a very fine point and make it as perfect as possible, the *Refine Edges* mode and a number of post-processing tools are available.

In **Version 10** the new **Refine Radius** tool has been added to the *Refine Edges* mode. The tool lets you locally fine-tune the boundaries of the selection.

The **Magic Brush** tool has been improved and now offers a number of new settings allowing you to more precisely define the colors to keep/drop.

Also, the new version comes with the new Gray interface theme, support for new RAW files for the standalone version, and some bug fixes.

[Download AKVIS SmartMask 10](#) and try all features of the software during the 10-day trial period.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; Mac OS X 10.7-10.11 and macOS 10.12-10.13. The product is available as a standalone application and as a plugin filter for Adobe Photoshop and other image editors.

AKVIS SmartMask, Home license, sells for \$69. One license key allows activating and using the software on two computers. [Consult the official website](#) for more details about license types and prices of the software.

The update is free for users who bought SmartMask in the last 12 months. Users, whose license is older and is not valid for the new version, can get SmartMask 10 for only \$14.95.

AKVIS (akvis.com) specializes in development of video & image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
